

# Project of Global School Health Education UNESCO chair

*Universities together with institutions, international networks, NGO to improve education and health in schools*

## THINK-TANK      KNOWLEDGE-HUB      BRIDGE BUILDER

The main original feature of the project is the way it is **connected to UN agencies** and deeply **rooted in the existing international networks** which allow it to act as a **strategic resource** for knowledge production, knowledge transfer, intervention tools design, capacity building and political consultancy at a global level. The chair aims to be a catalyst of change **by contributing to strengthen the evidence-base, create new intersectoral synergies and nurture the institutions, networks and civil society.**

**Didier Jourdan, Blaise Pascal University**
