**#Social
collaboration**

**#Social security
values**

This program is developed with the Ministry of Labor of Colombia, with the purpose of offering principles and basic measures to prevent accidents in schools, as well as to provide guidance to generate healthy habits. Designed under an articulated social policy where social security and education sectors come together in training actions for school communities. Based on MOOC Courses with games and interactive activities. The program has covered almost 5,000 teachers and 88,000 students. www.ciess.org
