DEAR READER

The WASH in Schools Network (UNICEF, GIZ, Save the Children, WaterAid; Emory, LSHTM, among others) has compiled this knowledge map with links to relevant materials about COVID-19. The map addresses information needs for learners, their families and the education system as a whole. This includes the school level, the sub-national level as well as the national level. The map is intended for the time when schools are closed and in preparation for re-opening of schools.

We want to help you navigate through the vast amount of information about COVID-19, specifically its relevance for the school community. Therefore, we selected relevant information from high-quality, reliable sources for the education system, families and for pre-primary, primary and secondary school children.

Handwashing with soap is the first line of defense against COVID-19. Water, sanitation and hygiene are essential services to tackle coronavirus and need to reach everyone including children. Those providing WASH services during the pandemic need to ensure they 'do no harm' through their response. This means no direct people-to-people / community gatherings for hygiene promotion whilst social distancing guidance is in place and ensuring any messaging avoids stigmatising or increasing the risk of violence or backlash to any group.

We will update the material regularly and include new material.

Please write to WinS-COVID-19@susana.org, if you come across helpful websites, links or videos. Following a careful quality control it may be included in our knowledge map.

Worldwide, schools are centres of community life where children spend at least half of their days. Yet, WASH in Schools (WinS), needs to be improved. Nearly half (47%) of schools lacked soap and water for handwashing in 2016. Closing this gap will be critical to containing the spread of COVID-19 as social distancing measures and associated closures are lifted. This importance is recognized in the Sustainable Development Goals. WinS is explicitly mentioned in SDG 4.A.1, which aims for all children to attend schools that provide students access to basic WinS services, consisting of:

- (a) drinking water at school from an improved water source,
- (b) improved sanitation facilities, which are single-sex and usable (available, functional, private),
- (c) handwashing facilities, which have soap and water available.

These are ambitious goals that require focused, coordinated efforts to achieve them everywhere by 2030.

CORE MESSAGES FOR CHILDREN DURING COVID-19 RESPONSE

- Wash your hands with soap and water for at least 20 seconds, especially
 - after going to the toilet
 - before touching food, eating or feeding a child
 - after coughing and sneezing
 - after playing or doing things outside
 - When you sneeze or cough, cover your face with your bent elbow or cover your nose and mouth with a tissue and throw it away in a closed bin.
 - Tell your family or someone who looks after you if you feel unwell, have a fever, cough or find it difficult to breathe.
 - Don't touch others when greeting. You can use gestures like waving, bowing, a namaste or hand on your heart. Keep apart from people outside your family (at least 1 meter) if you can.
 - Try not to touch your face, nose, mouth.
